

What you need to know about **coronavirus**

Be your **Healthiest You**

Coronavirus (COVID-19) is a respiratory illness caused by a virus that was first identified in China. It is highly contagious and includes symptoms like fever, cough, and shortness of breath. The risk in the U.S. is currently low, but knowing how to protect yourself is key. Here are three tips:

- 1 Keep it clean**
Clean your hands with soap and water for 20 seconds after touching surfaces in public areas, and especially if you are around someone who isn't feeling well. Also, clean and disinfect frequently touched objects.
- 2 Avoid contact with sick people**
Avoid close contact with people who are sick and avoid traveling to locations where there are outbreaks of the coronavirus. And if you get sick, stay home to avoid spreading the virus to others.
- 3 Contact HealthiestYou**
There is no cure for coronavirus, but if you have symptoms of the virus, contact HealthiestYou and our doctors can evaluate your risk and help with next steps when necessary.
